

English

The Toyota Automobile Museum was established to commemorate the history of the automobile and is dedicated to building a prosperous future for humans and motorcars.

Toyota Automobile Museum showcases the worldwide history of automobiles and automobile culture. The Automobile Gallery exhibits the history of automobiles from the birth of gasoline cars at the end of the 19th century to modern times. Approximately 150 vehicles from Japan, the United States, and Europe are used to demonstrate the advancement and diversification of motorization in each country, as well as how each country was inspired by its interaction with the others. Japanese History of Car Making presents the origins of the Japanese automobile industry. The Cultural Gallery features the Automobile Culture Showroom where a selection of approximately 4,000 automobile-related cultural items including posters, toy automobiles, and car mascots are on display. With today's automobile industry facing a once-in-a-hundred-years turning point, we are returning to our starting point and focusing on the future of mobility, with the goal of becoming a museum that creates the automobile culture together with you.
